From here you can find most info you need to vet a coin. Here you see the comment section where anyone can leave a comment about the coin. I always check these to see what people say about the coin. If there is a bunch of negative comments about being a rug pull or not being able to sell this is where you will find it 1st.

The screenshot shows the BscScan website interface for a contract. The top navigation bar includes the BscScan logo, a search bar, and various menu items like Home, Blockchain, Validators, Tokens, Resources, Misc, and a user profile. The main content area displays contract details for 'BabyDogeCoin: BabyDoge Token'. A blue arrow points to the 'Comments' tab in the navigation bar, which is highlighted with a green dot. Below the navigation bar, there is a table of transactions with columns for Txn Hash, Block, Age, From, To, Value, and [Txn Fee].

Contract Overview

Balance:	912,848476782147422042 BNB
BNB Value:	\$288,454.23 (@ \$315.99/BNB)
Token:	\$25,099.04 >100

My Name Tag:	Not Available, Update?
Contract Creator:	0xf103d2aba493749a40... at txn 0xb3787e14ca6d6662e9...
Token Tracker:	Baby Doge Coin (BabyDoge)

Transactions

Txn Hash	Block	Age	From	To	Value	[Txn Fee]
----------	-------	-----	------	----	-------	-----------

This tab allows you to view the contract and source code of the coin

The screenshot shows the BscScan interface for a contract. The 'Contract' tab is selected and highlighted with a blue arrow. Below the navigation bar, there are buttons for 'Code', 'Read Contract', and 'Write Contract'. A search bar for source code is also present. A green checkmark indicates 'Contract Source Code Verified (Exact Match)'. The contract details section shows 'Contract Name: CoinToken', 'Compiler Version: v0.6.12+commit.27d51765', 'Optimization Enabled: Yes with 200 runs', and 'Other Settings: default evmVersion, Apache-2.0 license'. The 'Contract Source Code (Solidity)' section is expanded, showing a code editor with the following Solidity code:

```
1- |/**
2- | *Submitted for verification at BscScan.com on 2021-06-20
3- | */
4- |
5- | pragma solidity ^0.6.12;
6- | // SPDX-License-Identifier: Unlicensed
7- | interface IERC20 {
8- |
9- |     function totalSupply() external view returns (uint256);
10- |
11- |     /**
12- |      * @dev Returns the amount of tokens owned by `account`.
13- |      */
14- |     function balanceOf(address account) external view returns (uint256);
15- |
16- |     /**
17- |      * @dev Moves `amount` tokens from the caller's account to `recipient`.
18- |      *
19- |      * Returns a boolean value indicating whether the operation succeeded.
20- |      *
21- |      * Emits a {Transfer} event.
22- |      */
22- |     _internal returns (bool);
```

There are a few options on reading the code if you know what to look for you can find all the functions here. But there is an easier way to check if you do not know how to read solidity files
